PROFESSIONAL SUMMARY

IT Infrastructure & Security Engineer with 9+ years of hands-on experience in server administration, networking, cloud infrastructure, Microsoft 365, mail systems, application hosting, cybersecurity, monitoring, backup and automation. Currently working as a Network Engineer at CPGBPM, handling end-to-end IT infrastructure including Linux and Windows production servers, cloud platforms, web/application services, databases, mail infrastructure, firewalls, IT auditing, quarterly VAPT, monitoring, backup/recovery and DevOps automation.

AREAS OF EXPERTISE

- ✓ Linux Server Administration
- ✓ Windows Server Administration
- ✓ Microsoft 365 & Azure
- ✓ Monitoring & Troubleshooting
- ✓ IT Auditing & VAPT
- ✓ Automation & Scripting
- ✓ Mail Server Administration
- ✓ Git / GitHub / GitLab
- ✓ Odoo Hosting
- ✓ Networking & System Integration
- ✓ Cloud Computing & Virtualization
- ✓ SQL & Database Management
- ✓ Backup & Disaster Recovery
- ✓ Firewall & VPN Security
- ✓ CI/CD & DevOps
- ✓ Web & Application Hosting
- ✓ Docker / Ansible / Terraform
- ✓ Active Directory & Endpoint Management

PROFESSIONAL EXPERIENCE

CPGBPM

Network Engineer | CURRENT

- Manage end-to-end IT infrastructure across Linux/Windows servers, networks, production applications, websites, databases and security systems.
- Administer Windows Server 2008/2008 R2, 2012/2012 R2, 2016, 2019 and 2022; Ubuntu 20.04/22.04/24.04/26.04 LTS; and CentOS environments.
- Manage AWS, Microsoft Azure, DigitalOcean and Linode infrastructure, including provisioning, configuration, maintenance and recovery.
- Manage Nginx, Apache, Tomcat and IIS; DNS, reverse proxy, domains and SSL/TLS certificates including Let's Encrypt/Certbot.
- Manage PostgreSQL, MySQL and MariaDB; administer FortiGate/pfSense, VPNs, secure remote access and network security controls.
- Manage Microsoft 365, Exchange Online, SharePoint, OneDrive and Teams; administer Intune/Endpoint Management and support Purview, PST management and cloud backup.
- Design, install and configure Mailcow; manage domains, mailboxes, aliases, SMTP, IMAP/POP3, DNS/MX, SPF, DKIM, DMARC, SSL/TLS and Mailcow Docker services.
- Manage Wazuh security monitoring; conduct quarterly IT audits and quarterly VAPT across infrastructure and production web applications, including remediation tracking.
- Develop Python, Bash and PowerShell scripts; maintain Ansible playbooks for configuration, health checks, monitoring and reporting.
- Use Terraform, Jenkins, Docker/Docker Compose and Git/GitHub/GitLab for Infrastructure-as-Code, CI/CD, deployment and version control.
- Implement automated monitoring, health checks and service recovery/restart procedures; manage backup, restoration and disaster recovery.

ITWAGON

Network Engineer | 10 June 2025 – [30-12-2025]

- Administer Microsoft 365 users, groups, roles and licenses; manage Exchange Online mailboxes, transport rules, spam filters and retention policies.
- Administer SharePoint, OneDrive and Teams; implement MFA, Conditional Access, DLP and email security controls.
- Administer Microsoft Intune / Endpoint Manager for Windows, iOS, Android and macOS enrollment, configuration, application deployment and compliance.
- **Manage Sophos Central cloud-based firewall infrastructure**, including firewall policies, security rules, VPN connectivity, monitoring and centralized security management.
- **Manage and monitor endpoints using ConnectWise RMM**, including remote access, system monitoring, alerts, software deployment, patch management and remote troubleshooting.
- Perform remote monitoring and troubleshooting of client systems through centralized RMM tools and respond to infrastructure alerts and incidents.
- Support endpoint security, device compliance, user access and Microsoft cloud administration..

SOCIUS INNOVATIVE GLOBAL BRAIN RESEARCH AND DEVELOPMENT

Server Engineer | 03 April 2023 – 17 January 2025

- Managed AWS, DigitalOcean and Linode servers, including backups, snapshots and restoration; administered CentOS, Ubuntu and Windows Server.
- Managed VMware and Microsoft Hyper-V virtualization environments and maintained virtual machines.
- Hosted and supported Odoo using Linux, Nginx, PostgreSQL and SSL/TLS.
- Managed VPN projects, pfSense/FortiGate firewalls and secure SSH access with key-based authentication.
- Managed Microsoft 365 users, licenses and email configurations; installed Dell PowerEdge R720/R650 rack servers in data centers.
- Used Monit and Datadog for server monitoring, performance optimization and issue resolution.
- Set up and managed Zimbra, hMailServer and Google Workspace/G Suite; managed Linux cPanel hosting.
- Managed Docker/Docker Compose environments for containerized application deployment.
- Developed Python, Bash and PowerShell scripts; maintained Ansible playbooks for configuration, health checks, monitoring and automated reporting.
- Used Terraform for Infrastructure-as-Code; managed Jenkins CI/CD workflows and Git/GitHub/GitLab version control.
- Implemented automated health checks, monitoring, service recovery/restart, networking, backup and data recovery

JP COMPUTERS | NAGERCOIL, TAMIL NADU

IT Support & System Administrator | 08 August 2017 – 03 April 2023

- Installed, configured and maintained servers and Windows operating systems; performed server setup, maintenance and troubleshooting.
- Installed and configured CCTV surveillance systems, cameras, DVR/NVR equipment and network connectivity.
- Repaired laptops, desktops, printers and peripherals; diagnosed hardware, operating-system and software issues.
- Configured routers, switches, firewalls, VPNs, LAN/Wi-Fi and provided on-site/remote technical support.
- Performed data recovery and coordinated with vendors to resolve technical issues.

EDUCATION

2010 – 2012 | SKPC Kanyakumari, Tamil Nadu Diploma – Automobile Engineering

CERTIFICATION

AWS | Red Hat | CCNA | Microsoft Office 365 Administration

TECHNICAL SKILLS

Programming & Scripting	**:** Python, Bash, PowerShell
Automation & IaC	**:** Ansible, Terraform
CI/CD & Version Control	**:** Jenkins, Git, GitHub, GitLab
Server Administration	**:** Windows Server 2008/2008 R2, 2012/2012 R2, 2016, 2019, 2022 | Ubuntu 20.04/22.04/24.04/26.04 LTS | CentOS 7, 8, Stream 9
Cloud Platforms	**:** AWS, Microsoft Azure, DigitalOcean, Linode
Virtualization	**:** VMware, Hyper-V
Networking	**:** TCP/IP, DNS, DHCP, VPN, LAN/Wi-Fi, IPsec
Firewall & Security	**:** pfSense, FortiGate, Wazuh, SSL/TLS, SSH
Mail Servers	**:** Mailcow, Zimbra, hMailServer, Google Workspace/G Suite, Microsoft 365 Exchange Online
Web & Application	**:** Nginx, Apache, Tomcat, Microsoft IIS, Odoo, HTML, CSS
Databases	**:** MySQL, PostgreSQL, MariaDB, SAP HANA
Containers	**:** Docker, Docker Compose
Monitoring & Recovery	**:** Monit, Datadog, Nagios, Rsync, Bacula, AWS Backup, Snapshots
Microsoft Cloud & Endpoint	**:** Microsoft 365, Exchange Online, SharePoint, OneDrive, Teams, Azure, Intune, Purview, Endpoint Management, PST Management, Cloud Backup.
Data Center	**:** Dell PowerEdge R720, R650, Rack Servers
Security Testing	**:** Nmap, Nikto, OWASP ZAP, IT Auditing, VAPT
